

Create a list of all strips

Find bottom strip

For each strip

Count amount of white pixels in bottom row

for each pixel
if rgb value = 000

Increase white counter

If white count is larger than that
of previous strip

Save white count and strip

Return strip with largest
amount

Find similar above strips

Compare selected strips to remaining
strips

For each pixel

Compare distance between pixel
colors

Return list of ordered
strips

Return sum of all
distances

Stitch images together

Set each pixel of each strip in order to
create a new image
